

Maths Week 2

Each of the following shapes has a value

$= 2$

$= 4$

$= 10$

What is the total value of the following two shapes when you put them together?

How about these?

Find the total value of these shapes. What do you notice?

Use a combination of shapes to show the following values. Can you find more than one way to show the values?

Easy: 4, 6, 8, 10

Medium: 14, 18, 20

Hard: 24, 28, 32
